

DIGICONN

Automated
outbound messages

SMS
MMS
Voice

OUR HISTORY

Founded 2022 in Lebanon, DigiConn began simply with automating outbound phone calls using text-to-speech technology. By the end of 2022, DigiConn expanded to include text messaging and picture messaging.

OUR STORY

With several years working in software development, primarily in healthcare revenue cycle management, it was apparent there was a lack of affordable patient communication. Starting with this in mind, DigiConn was created. Not only does our platform help in the RCM space, but in just about any other industry.

WHAT WE OFFER

Client Portal

Free client portal to manage contacts and contact groups. Send ad-hoc messages to your groups.

High Volume

Our software is capable of sending hundreds of thousands of messages per day.

Carrier Connections

We are directly connected to the top cell carriers, approved to send messages through toll-free numbers and through our 10DLC registration.

OUR VISION

DigiConn's goal is to help our customers create digital connections with their contacts. Whether our customers need to send statement notifications, appointment reminders, organization announcements, or anything in between, we have them covered.

OUR MISSION

DigiConn's mission is to help our customers create digital connections, allowing them to communicate effectively while saving time and money.

Here is the reason why
WHY CHOOSE US

DigiConn is connected with the primary cell carriers, covering 99.9% of the US cell phone users. Our platform is built to send hundreds of thousands of messages per day covering any volume needed.
